Summary:

Recent graduate seeking software-development position in Dublin City. Prior employment includes pre-sales support for a Java cybersecurity product, internship developing serverless microservices on AWS, and web-development for local medical centre. Portfolio viewable at oisinbates.com.

Projects:

Examples of of previous projects using AWS, Python, Bash, Java, and Javascript are viewable at oisinbates.com. My current hobby-project (cheapdublinrent.guru) aims to use serverless AWS infrastructure to actively curate Dublin's cheapest available rental properties.

Work Experience:

Nov. 2016 - May. 2017: Waratek (Pre-Sales Support Engineer)

Tested, demoed, administered, and supported Proof of Concept environments for Waratek. Created screencasts, videos and documentation for internal use & sales/marketing teams. Worked with technologies including AWS, Vagrant, Linux(RedHat/Ubuntu), Java, Bash, and Python2. Workflow was managed via Atlassian collaboration tools (Jira, Confluence, Bitbucket).

Oct 2016 - present: Bath Avenue Medical Centre (Web Developer)

Built and manage websites with Jekyll and Squarespace. Scripted waiting-room signage on Ubuntu Linux for concurrently displaying advertising and RSS news feeds.

May 2016 - Jun. 2016: Electricity Exchange (Software Development Intern)

Developed a serverless solution for contacting clients by phone and text, which significantly reduced operating costs. Main technologies were AWS Lambda and EC2 Linux, Node.js, MySQL and Twilio.

Jan. 2015 - Jul. 2015: Lloyds Banking Group (PPI Review Assessor)

Analysed Payment Protection Insurance (PPI) missale complaints, researching the financial backgrounds and eligibility of customers.

Jan. - Jul. 2011: Clare Vocational Educational Committee (Adult Education Tutor)

Main teaching duties were English-language tutoring and 1-1 workshops teaching computer skills to senior citizens.

Education:

Aug 2017 (Expected): AWS Certified Solutions Architect - Associate

Studying the acloud.guru syllabus, alongside Amazon's documentation.

2015-2016: University of Limerick. Higher Diploma in Software Development.

3.2 QCA with A grades in Java, MySQL, Relational DB Design, and Mobile Design/Development.

Technologies:

University study: Java, Android Studio, PHP, MySQL.

Extra-curricular study: Linux, Python 2.7, AWS, Node.js.

Fields of study:

Object-oriented design & development, Relational Database design, MySQL, Mobile App Development, Software testing, Web Infrastructure.

2013-2014: University of Limerick. M.A. History. (3.9 QCA)

Included 21,000-word dissertation on the subject of policing during the Anglo-Irish War and the Irish Civil War, researching local and national government records.

A chapter was chosen for publication in the academic journal *History Studies*.
